There’s certainly not as many clued in to that ‘visual hallucinations’ are just examples of when someone is ClairVoyant. With the enlivenment of the Brow Chakra (see following image) the person becomes ClairVoyant.

One thing that I’ll certainly say about most Psychiatrists – “They don’t appear to be very well-read!”

Honestly - there is a point I get to where I get sick of rubbishing them! There is a reason why the Brow Chakra is colloquially called “the Third Eye”.

'visual hallucinations'
